THE VALUE OF CHARCOAL.

Few People Know How Useful it is in Preserving Health and Beauty. Nearly everybody knows that charcoul is the safest and most efficient disin-fectant and purifier in nature, but few realize its value, when taken into the human system for the same cleaning purpose.

purpose. Charcoal is a remedy that the more you take of it the better; it is not a drug at all, but simply absorbs the gases and impurities always present in the stomach and intestines and carries them out

of the system.

Charcoal sweetens the breath after

ach and intestines and carries them out of the system.

Charcoal sweetens the breath after smoking, drinking or after eating onlons and other odorous vegetables.

Charcoal effectually clears and improves the complexion, it whitens the teeth and further acts as a natural and eminently safe cathartic.

It absorbs the injurious gases which collect in the stomach and boweis; it disinfects the mouth and throat from the poison of catarrh.

All druggists sell charcoal in one form or another, but probably the best charcoal and the most for the money is in Stuart's Charcoal Lozenges; they are composed of the finest powdered Willow charcoal, and other harmless antiseptics in tablet form or rather in the form of large, pleasant tasting lozenges the charcoal being inixed with honey.

The daily use of these lozenges will scon tell in a much improved condition of the general health, better complexion, sweeter breath and purer blood, and the beauty of it is, that no possible harm can result from their continued use, but on the contrary, great benefit.

A Buffalo physician in speaking of the benefits of charcoal, says: "I advise Stuart's Charcoal Lozenges to all pattents suffering from gas in stomach and bowels, and to clear the complexion and purify the breath, mouth and throat; I also believe the liver is greatly benefited by the daily use of them; they cost but twenty-five cents a box at drug stores, and elthough in some sense a patent preparation, yet I believe I get more and better charcoal in Stuart's Charcoal tablets."

A Little Information.

How Our Work is Made. The shoulders in all Coats are HAND-TAILORED and "worked out" by a method of our own, which will insure perfectly moulded shoulders, free from all "breaks" or wrinkles. The fronts of Coats will be so handled as to prevent breaking, losing their shape or rolling backwards,

Every garment is made in our own workshop on the premises and under my own personal supervision.
